

**If your boiler's
working overtime,
you're paying for it.**

No matter what the temperature is outside, Honeywell's Wireless AquaReset® ensures boilers are running efficiently inside.

Honeywell

Boilers are made to handle the heating needs of a home under that coldest possible outdoor temperature conditions, but what happens when temperatures are milder in spring and fall? Most boilers still operate like its freezing outside, running at higher temperatures than necessary, wasting money and energy. **Honeywell's Wireless AquaReset®** solves this problem by operating the boiler at more efficient settings based on the outside temperature.

UP TO 15% ENERGY SAVINGS

The Wireless AquaReset offers a simple benefit.

It saves homeowners up to 15% in energy costs at a price that's affordable. In many cases, it pays for itself in less than two years! Contact your energy service provider and find out how you can start saving today with Honeywell's Wireless AquaReset.

*Honeywell Inc. 1979 Study; Control Systems Providing Energy Savings with single and multi-zone Hydronic Heating. 15% is the average energy savings and can only be achieved when installing an outdoor reset model, domestic hot water priority is off and the unit is installed as directed.

Annual Fuel Cost	Savings
\$2,000	\$300
\$2,500	\$375
\$3,000	\$450
\$3,500	\$525
\$4,000	\$600
\$4,500	\$675
\$5,000	\$750

How much could you save?

Annual Fuel Cost x .15 = _____
