

The Mixing Valve Benefits Are Clear

Adding a Honeywell Mixing Valve to your water heater installation improves safety and comfort at a great value. **A mixing valve provides:**

- **Comfort:** Gives you 50% more hot water
- **Safety:** Prevents scalding
- **Peace of Mind:** Helps prevent the growth of dangerous bacteria in your water heater*

Call us today to schedule an installation of a Honeywell Mixing Valve to give your family improved comfort, safety and peace of mind.

*Experts recommend you keep your hot water heater at 140 degrees to prevent the growth of bacteria
